The Peru's Economic and Business Report presents quarterly progress and projections of the main macroeconomic indicators.

Peru is considered one of the most important countries in Latin America and one of the world's leading emerging markets, with a solid recent history of economic and business stability.

Peru's macroeconomic strengths - low levels of debt, inflation and fiscal deficit, while maintaining high levels of international reserves - is widely recognized, not only by credit rating agencies but also by worldwide investors.

1

COUNTRY OVERVIEW

Government

Peru is a democratic constitutional republic with a multiparty system. The President is the Chief of State and Head of Government and is elected every five years.

► President until July 28, 2026: Pedro Castillo.

The President appoints the Prime Minister and the members of the Cabinet. There is a unicameral Congress of 130 members elected for a five-year period. For the period 2021-2026, congressional representation consists of ten parties.

The legislative proposals can be submitted by both the executive and legislative branch and will become law once they are approved by the Congress and promulgated by the President. The judicial and electoral bodies are independent.

Geography

► Located on the west central coast of South America, Peru is bordered by the Pacific Ocean to the west, by Chile to the south, by Brazil and Bolivia to the east, and Colombia and Ecuador to the north.

► Peru is divided geographically into three natural regions: the coast, a narrow strip measuring approximately 3,080 km long that accounts 11.7% of Peru's territory; the highlands, site of the Andean mountain range covering 27.9% of the national territory; and the amazon rainforest, which occupies 60.4% of the territory and is rich in petroleum and forest resources.

The Central Reserve Bank maintains a strong expansionary monetary policy, keeping the interest rate low at 2.00% as of November 2021.
